### Application No. Applicant(s) 10/592.010 HERRMANN ET AL. Office Action Summary Examiner Art Unit WU-CHENG Winston SHEN 1632 -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS. WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status 1) Responsive to communication(s) filed on 2a) ☐ This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 1-6.10.12.15.19 and 21 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) \_\_\_\_\_ is/are allowed. 6) Claim(s) \_\_\_\_\_ is/are rejected

5 | Claim(s) \_\_\_ is/are allowed.
6 | Claim(s) \_\_\_ is/are rejected.
7 | Claim(s) \_\_\_ is/are rejected.
8 | Claim(s) \_\_\_ is/are objected to.
8 | Claim(s) 1-6.10.12.15.19 and 21 are subject to restriction and/or election requirement.

Application Papers

9 | The specification is objected to by the Examiner.
10 | The drawing(s) filed on \_\_\_ is/are: a) | accepted or b) | objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
11 | The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

2. Certified copies of the priority documents have been received in Application No.

Certified copies of the priority documents have been received.

#### DETAILED ACTION

Preliminary claim amendments filed on 09/07/2006 have been entered. Claims 1-6, 10, 12, 15, 19, and 21 are pending.

#### Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1-6, 10, 12, and 21, drawn to an expression system, containing one or more nucleic acid(s) comprising a) at least one nucleic acid for an IL-15/Fc fusion protein, b) at least one promotor and c) at least one nucleic acid for a CD5 leader, the promotor and the nucleic acid for the CD5 leader being functionally linked to the nucleic acid for the IL-15/Fc fusion protein (claim 1), a nucleic acid, containing the components a) to c) of claim 1 (claim 10); and a host cell, containing an expression system according to claim 1 or a nucleic acid according to claim 10 (claim 12).
- Claim 15, drawn to a process for preparing an IL-15/Fc fusion protein, comprising

   a) providing a host cell according to claim 12, b) culturing the host cell, c)

Art Unit: 1632

selecting, where appropriate, and d) isolating the expressed IL-15/Fc fusion protein.

- III. Claim 19, drawn to a method of expressing a protein in a CHO cell or a derivative thereof comprising a) functionally linking the nucleic acid encoding the protein to the nucleic acid encoding the CD5 leader; and b) expressing the protein in the CHO cells and or the derivatives thereof.
- 2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Applicant's claims encompass multiple inventions, multiple products (Group I) and multiple methods (Groups II and III), and do not have a special technical feature which link the inventions one to the other, and lack unity of invention. The common technical feature in all groups is functionally linking the nucleic acid encoding the protein to the nucleic acid encoding the CD5 leader. However, this common technical feature cannot be a special technical feature under PCT Rule 13.2 because the feature is shown in the prior art. Sutherland et al. teaches CD5 leader sequence was fused to the Fc of mouse IgG2c, and expressed transgenically under the control of the rat insulin promoter in C57BL/6 mice (See abstract, Sutherland et al., Protective effect of CTLA4Ig secreted by transgenic fetal pancreas allografts, Transplantation, 69(9):1806-12, 2000).

Art Unit: 1632

## MPEP 1893.03(d) Unity of Invention Rejoinder

3. MPEP 1893.03(d) states: If an examiner (1) determines that the claims lack unity of invention and (2) requires election of a single invention, when all of the claims drawn to the elected invention are allowable (i.e., meet the requirements of 35 U.S.C. 101, 102, 103 and 112), the nonelected invention(s) should be considered for rejoinder. Any nonelected product claim that requires all the limitations of an allowable product claim, and any nonelected process claim that requires all the limitations of an allowable process claim, should be rejoined. See MPEP § 821.04 and § 821.04(a). Any nonelected processes of making and/or using an allowable product should be considered for rejoinder following the practice set forth in MPEP § 821.04(b).

4. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction were not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Application/Control Number: 10/592,010

Art Unit: 1632

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103 (a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication from the examiner should be directed to WuCheng Winston Shen whose telephone number is (571) 272-3157 and Fax number is 571-2733157. The examiner can normally be reached on Monday through Friday from 8:00 AM to 4:30
PM. If attempts to reach the examiner by telephone are unsuccessful, the supervisory patent
examiner, Peter Paras, Jr. can be reached on (571) 272-4517. The fax number for TC 1600 is
(571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private
